

SPACERAK

SELECTIVE STORAGE RACK

Structural Steel

For heavier duty than our popular roll-formed steel selective rack, structural steel channels add capacity and damage protection while providing immediate FIFO access to every pallet. Designed for maximum versatility for SKUs of nearly any volume, weight or size, this system is easy to install, reconfigure and even keep clean.

FEATURES AND OPTIONS

- Channel Beams
 - » Channel beams heights from 3" to 8" and with multiple material density options to handle almost any load
 - » Standard 8" x 2-bolt, 4-hole end connectors allow for 2" vertical adjustability
 - » Connection hardware included
 - » Pinned end connectors are available to attach to roll formed frames
- Frames
 - » 3" and 4"-wide columns—light and heavy-duty options
 - » Offset kant-leg and step-back base options help prevent column damage
 - » Welded column reinforcements for added capacity and increased impact damage resistance
 - » Oversized base plates for seismic areas and increased capacity
- Accessories
 - » Row spacers, crossbars, wall ties, column guards, retail accessories and more are available to further customize your storage system

For additional details, see capacity charts at www.spacerak.com/capacitycharts.
